## EDUCATION

---

**Jensen yrkeshögskola,**  
Web Developer

**Malmö**

- At Jensen I have developed strong expertise in full-stack web development, working extensively with **JavaScript, React, Node.js, Express, SQL, and MongoDB** to build modern, scalable applications. Through hands-on projects, I have gained experience in **frontend architecture, database management, API integrations, and authentication**, while also refining my ability to **debug efficiently, optimize performance, and implement best practices**. Collaborating in agile teams has strengthened my **problem-solving skills and adaptability**, ensuring that I can contribute effectively in fast-paced development environments.

**Karlstad university**  
Web Developer

**Karlstad**

- At **Karlstad University** I gained a foundation in **IT systems, business strategy, and software development**, learning how to plan, prototype, and implement digital solutions within organizations. While introduced to **Java, JavaScript, and C**, the primary focus was on **IT infrastructure, system planning, and aligning technology with business objectives**. This background has given me a **holistic understanding of how digital solutions are designed, implemented, and maintained within professional environments**, making me more effective at bridging the gap between development and business needs.

## WORK EXPERIENCE

---

**Freelance web developer**

- At **Loni Cosmetics** I designed and built a **custom e-commerce platform**, transforming business requirements into a **responsive, user-friendly, and scalable solution**. This project required close collaboration with stakeholders to ensure their vision was accurately implemented while also integrating secure payment solutions, inventory management, and an optimized user experience. Working directly with a client reinforced my ability to gather requirements, adapt to feedback, and deliver high-quality digital products that align with business goals.
