- Figma
- PHP

Education

Web Developer
Jensen Yrkeshögskola Malmö 2024-2026

Web Developer
Karlstad University 2023 - 2024

Experience

Fullstack Developer Intern 2025
Twentyfour

- Analyzed customer needs and collaborated with the Product Owner to integrate business requirements into scalable web applications and integration systems.
- Implemented new features, optimized performance, and resolved critical bugs to improve stability and user experience across client projects
- Gained practical experience in system integration, Docker-based development environments, and API communication between microservices
- Worked closely with senior developers, learning how to structure larger projects and apply best practices in both frontend and backend development

Freelance Web Developer 2024-2025
Loni Cosmetics

- Developed secure and reliable web solutions to meet customer requirements.
- Developed custom websites to meet individual clients needs.

About me

As a web developer, I focus on building scalable, maintainable, and user friendly applications that balance performance, functionality, and design. Through practical experience in professional development environments, I have strengthened my ability to write clean code and work efficiently with modern frameworks and tools. My practical experience has deepened my understanding of system integration, API communication, and Docker based development workflows.

I have also honed my communication and collaboration skills, working closely with team members and stakeholders to plan, implement, and deliver high quality software solutions. Whether designing intuitive web interfaces or contributing to complex backend systems, I thrive in dynamic environments where learning, problem solving, and teamwork drive meaningful results.
